4113 Oleatha Ave - St. Louis, MO. 63116

A bit about me:

I'm interested in finding opportunities to grow and develop as a programmer, to make finding creative solutions to problems my career.

Technical Skills:

Python
HTML/CSS
Java - MVC framework using Springboot and Thymeleaf
Mama and phpMyAdmin

Projects: You can find previous and ongoing project work on my GitHub:

<https://github.com/therealandrewrea>

Take a Hike - <https://github.com/therealandrewrea/hike.git> - Interactive site that allows users to upload and categorize local hiking trails - users can set custom categories and labels for trails they've uploaded and search based on these criteria.

- Java and HTML MVC framework with Springboot/Thymeleaf
- Individual Trail Objects referenced with user-generated and preset categories
- Search by string for categories, descriptions, locations, trail names

2017 Winter LaunchCode 101 session: Python, HTML/CSS, Java

- Cooperated with fellow programmers to debug and refine code in multiple languages
- Illustrated key concepts (object oriented programming, GUIs, conditionals) with Python
- Explored HTML, CSS and Bootstrap for Front-end and View element of MVC model
- Went full-stack with Java and Thymeleaf to create interactive web applications

Work Experience:

Square Inc - Full-Time Flex Supporter

November 2015 to present

Using soft skills and product knowledge to assist 50+ customers a day. Used project management tools (Confluence, JIRA) to file bugs and refine support structure.

Education:

LaunchCode LC101 - Python, HTML, JAVA/MVC

HackerRank - Basic programming skills, keeping sharp

Udacity - Web Development Course

University of Missouri - Columbia - BA - Theatre Performance
